

Equipment for cycle tracks, trestles and bridges

I claim:

1. Equipment for cycle tracks, trestles and bridges, intended for comfortable entry up by a ramp on a bicycle, containing:
 - a gutter for bicycle wheels, installed on the roadbed;
 - hand-rails for the hands of the cyclist, installed along the mentioned gutter.
2. Equipment for cycle tracks, trestles and bridges, intended for comfortable riding on a bicycle, containing:
 - a roof over the cycle track, protecting it from atmospheric precipitations;
 - side walls on the sides of the cycle track, having jalousies that allow penetration of outer wind flow, which is directed in the cyclists' movement direction, to the cycle track.
3. Equipment, as recited in claim 2, wherein the walls of which are made transparent.
4. Equipment, as recited in claim 2, wherein the mentioned jalousies are equipped by automatic and/or remote control.
5. Equipment, as recited in claim 2, on the roof of which a wind-catcher is installed, containing:
 - an upright frame, the ribs of which are interconnected by crossbars;
 - valves, hinged to the mentioned crossbars and intended for directing of outer wind flow down via an embrasure in the mentioned roof to the cycle track in the cyclists' movement direction.
6. Equipment, as recited in claim 5, containing hinged embrasures, which prevents wind flow in the direction opposite to the cyclists' movement direction.
7. Equipment, as recited in claim 6, wherein the hinges of the mentioned embrasures has automatic and/or remote control.
8. Equipment, as recited in claim 5, wherein a wind-driven unit, which is intended for placing on the bottom of the mentioned wind-catcher on the way of the wind flow, is installed on the roof of the cycle track.
9. Equipment, as recited in claim 5, wherein vertical fatnesses are installed along the mentioned ribs of the frame for increasing the concentration of the outer wind flow.
10. Equipment, as recited in claim 1 and/or 2, 9, wherein the roadbed of which has a steep ascent and a following gentle slope in the direction of the cyclists' movement.
11. Equipment, as recited in claim 1 and/or 2, 9, containing accessories for parking bicycles and/or bicycles for rent.
